(a) Published expenses are not conceptually the same as census expenses for the following items:

Crop Expenses: Census includes gross seed expenses while published includes only commercial seed expenses.

Feed and Supplements: Census measures gross feed while published measures only commercial feed (i.e. interfarm sales are excluded).

Livestock and Poultry Purchases: Census measures gross purchases while published measures only interprovincial purchases.

Custom Work: Census is gross custom work while published is net expense (gross custom work expense minus gross custom work receipt).

All Other Farm Operating Expenses: Census includes gross insurance premiums while published includes only net property and hail insurance premiums.

In addition, all Census estimates are gross of direct government rebates while all published data are net of direct government rebates. This affects interest, machinery expenses, crop expenses, feed and supplements, fuel for heating and crop drying and the property taxes components of all other farm operating expenses.

(b) Includes published estimates for: 1. Repairs to buildings and other structures, 2. Repairs to fences, 3. Property taxes, 4. Telephone, 5. Irrigation levies, 6. Insurance, 7. Breeding Assoc. fees, 8. Stabilization levies, 9. Misc. other expenses (legal, accounting, etc.).
